

SAFE GUARD Extreme Duty Tire Sealant

Air Lock Tire Technology
Formulated for Military and Industrial Vehicles

PERFORMANCE PRODUCTS GUARANTEED

SAFE GUARD Extreme Duty represents the pinnacle in state-of-the-art heavy-duty tire sealants. Extreme Duty was developed for use in the most hazardous tire environment ever conceived—the battlefield.

Extreme Duty has been field tested in a variety of military vehicle tires under actual battlefield conditions. Successful testing included puncturing tires with spikes up to 30 mm (1.25 inches), direct rifle fire into the tires, and detonating hand grenades 70 cm (27 inches) from tires. In each case, the test vehicles were then driven 100 miles off-road without any appreciable air loss.

SAFE GUARD Extreme Duty was put to the ultimate test in actual battle conditions in Bosnia and Rwanda with the same success experienced in the above field tests.

It goes without saying ... if Extreme Duty can perform under extreme battlefield conditions, it will provide the ultimate protection needed in any severe industrial or agricultural use, such as log skidders and cargo handling equipment in dock applications.

Extreme Duty is recommended for use in all military and extremely hazardous industrial or agriculture applications. For additional information on Extreme Duty, please refer to our website at <http://www.frontierlubricants.com>.

SAFE GUARD Extreme Duty Product Specifications

Appearance	Green viscous liquid
Odor	Slight sweet odor
Corrosion	Inhibited for ferrous and yellow metals
Solubility	Water soluble
Freezing Point	-30°F
