

ENVIRO-SAFE SAFETY SOLVENT

Parts Washing Solvent with D-Limonene
No. 803

DESCRIPTION:

Enviro-Safe Safety Solvent is a highly effective heavy-duty industrial solvent designed to remove heavy oil and grease deposits, tar and asphalt. This product contains special solvents and emulsifying agents to cut through heavy grease, grime and oil deposits. **Enviro-Safe Safety Solvent** is “environmentally preferred” because it is intended to replace products that are more hazardous, such as 1,1,1, Trichloroethane, MEK and mineral spirits.

FEATURES:

- **Easy Disposal:** **Enviro-Safe Safety Solvent** is not considered a hazardous waste product, therefore it can be disposed of in the waste oil tank, (provided it is not used to clean hazardous compounds).
- **High Flash Point:** The 142°F flash point of this product lessens the chance of combustion over other lower flash point solvents.
- **Low Odor:** By using the purest raw materials available, we are able to minimize the odor associated with strong solvents, resulting in enhanced worker acceptance.
- **Low Residue:** Dries without leaving an oxidation film, making it an ideal choice for demanding precision cleaning tasks.

TYPICAL APPLICATIONS:

Enviro-Safe Safety Solvent is an excellent parts and surface washing compound. This product will quickly penetrate to lift off and dissolve the following:

Greases	Oils	Carbon & Soot
Asphalt	Tar	Fuel Oils
Oil Base Stains	Asphalt Base Cements	Petroleum Residue

Can be used on the following surfaces:

Engines	Shop Floors	Trucks
Industrial Equipment	Farm Implements	Parts Cleaning
Construction Equipment	Paving Implements	Autos

And most other applications requiring an industrial strength solvent
