

## **CHAIN & CABLE LUBE**

No. 850

### **DESCRIPTION:**

**Chain & Cable Lube** is a mixture of penetrants, anti-oxidants, oils and greases. These penetrate into chain components and cable strands to provide maximum lubrication and rust prevention.

This very versatile chain lubricant also contains Molybdenum Disulfide and has a strong affinity to metals, this assures the ultimate lubrication of chains, sprockets, cables and wire ropes.

### **FEATURES:**

**Chain & Cable** is specifically designed to penetrate chains and lubricate the rollers, pins and bushings reducing chain whip, vibration and noise. This unique formula will not build up on chains to attract dust and dirt, this will greatly extend both chain and sprocket life.

### **USES:**

Chains	Cables	Wire Rope
Sprockets	High-Speed Chains	Roller Chains
Hoist Chains	Drive Chains	Drag Chains
Leaf Chains	Table Top Chains	Detachable Chains
Flat-Veyor Chains	Quadruple Chains	Conveyer Chain

### **TYPICAL APPLICATIONS:**

Canneries	Bottle Plants	Bakeries
Pellet Mills	Dairies	Food Processing
Meat Packing Plants	Lumber Mills	Farms
Steel Mills	Foundries	Construction Companies

... and many other industrial and agricultural applications requiring a tough, durable, water tight lubricating film.

### **PERFORMANCE CHARACTERISTICS:**

**Chain & Cable** will provide excellent protection against:

Extreme Pressure	Elevated Temperatures	Oxidation
Friction	Moisture	Corrosion
